PROFESSIONAL SUMMARY

MBA candidate in Business Analytics with hands-on experience transforming raw data into business decisions. Proficient in SQL, Python, Excel, and Tableau, with a track record of building ETL pipelines, RFM segmentation models, and executive dashboards on datasets of 10,000+ records. Focused on bridging the gap between data and strategy to drive measurable outcomes.

TECHNICAL SKILLS

Tools & Technologies: SQL, Python, Microsoft Excel, Tableau, Microsoft Power BI, Google Sheets, GitHub

Core Competencies: Data Analysis, ETL & Data Wrangling, Data Cleaning & Transformation, Dashboard Development, Data Visualization, KPI Tracking, RFM Analysis, Business Intelligence, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Data Analyst Trainee | **Invact Metaversity** *May 2025 – Jul 2025 • Remote, Lucknow, IN*

- Collected, cleaned, and analyzed datasets of 10,000+ records using SQL and Excel, applying ETL processes and data wrangling techniques to generate insights
- Developed 3+ interactive Tableau dashboards with KPI visualizations, enabling data-driven decision-making across cross-functional teams
- Performed data validation and governance checks to ensure accuracy, producing error-free reports across 6 consecutive review cycles

QA Tester & Release Manager | **eL Nova Labs** *Apr 2024 – Jan 2025 • Remote, Lucknow, IN*

- Designed and executed 100+ test cases for web applications, ensuring good test coverage across multiple releases
- Identified and documented defects, resolving 40+ issues within sprint timelines by working closely with developers
- Conducted regression testing to maintain software stability and reduce recurring defects across releases
- Managed release cycles for 5+ deployments, coordinating with QA and development teams to ensure smooth and timely delivery

PROJECTS

Guest Segmentation Dashboard – Serene Valley Resort | *Tableau, RFM Analysis, KPI Tracking* Live: https://public.tableau.com/app/profile/shivang.chaubey/viz/Shivang_SereneValley/Dashboard

- Built an interactive Tableau dashboard analyzing 100+ bookings and over Rs 16L in total revenue, segmenting guests based on booking behavior and spending patterns using RFM methodology
- Identified high-value VIP guest segments contributing approximately Rs 5.9L in revenue, supporting targeted marketing and retention strategies
- Analyzed booking frequency versus revenue trends to quantify the impact of repeat guests on overall business performance

Customer Segmentation – GroomWell | *Tableau, RFM Analysis, Excel* Live: https://public.tableau.com/app/profile/shivang.chaubey/viz/Shivang_GroomWell/Dashboard

- Applied RFM (Recency, Frequency, Monetary) analysis to segment customers into actionable groups: Champions, Loyal Customers, and At-Risk Users
- Built a Tableau dashboard tracking key business metrics including total revenue (~Rs 2.6L), purchase frequency, and average customer spending to support retention and loyalty strategies
- Identified high-value Champion customers contributing significantly to revenue, enabling focused business intelligence for campaign planning

Sales & Performance Analysis – ElectroMart | *Microsoft Excel, Data Wrangling*

- Analyzed a 15,000+ row sales dataset using ETL and data wrangling techniques to evaluate platform performance and product-level revenue trends across 6 e-commerce channels
- Built an interactive Excel dashboard tracking key metrics including Cost Per Unit (CPU), total units sold, and promotional coupon performance

- Identified top-performing coupon codes contributing up to 34% of total sales, providing actionable insights to optimize promotional strategies and improve business outcomes

EDUCATION

MBA, Business Analytics — Shri Ramswaroop Memorial University, Lucknow *2025 – 2027 (Expected: May 2027)*

B.A. (Hons), Public Administration — Babasaheb Bhimrao Ambedkar University, Lucknow *2016 – 2019*
